EDX London Rules and Regulations	EDX.4.1.21.4.10(1)
----------------------------------	--------------------

¹ VWAPcum = volume weighted average price at the day before ex-day (8 decimals are used)
b = redemption amount

New exercise and forwards prices have been rounded off to two decimal places and received an "X" or, if the series have been recalculated before, a "Y" in the series designation. As a result of the adjustment the number of shares per contract has increased to 104 for X-series and 111 for Y-series after rounding to the nearest full share, whereas exercise and forward prices have decreased. The series have also received new ISIN-codes which are published below. The rounding off of forward prices was made "trade by trade" and not on the net position.

Adjustment of OMX Stockholm 30 Index

OMX Derivatives Markets has received the index ombudsman's approval to use the redemption amount per share, SEK 5.00, when adjusting the start price for SKF ser. B (SE0000108227) in the OMXS30 Index on the ex-date. The start price for SKF ser. B on ex-date will be the closing price for SKF ser. B on the day before the ex-date subtracted by the redemption amount per share.

Members are encouraged to ensure that clients are aware of the above-mentioned adjustment.
