EDX London IT Notice 008/09 – Increase in the number of decimals for Strike Prices and Forward prices associated with single stock instruments dominated in EUR

26 May 2009

As from July 2009, EDX London will increase the number of decimals in strike prices and forward prices for single stock instruments denominated in EUR. Following the change strike and forward prices will have three decimals and the tick size will be 0.010 EUR. The reason for the change is to minimize rounding differences following recalculations and to increase the accuracy of the strike and forward prices.

EDX London will offer members and third party application developers the opportunity to test the described changes on four different Finish underlyings, on both external test systems. Four (4) underlyings will be used for testing. The changes will be applied to one underlying each week between 25 May 09 and 15 June 09. The table below shows when underlyings will be available for testing. Following the change a new short code will be created for each underlying.

Implementation Date	Company Name	Old Underlying	New Underlying
May 25, 2009	Outokumpu Oyj	OUT1V	OUT1V3
June 1, 2009	Metso Oyj	MEO1V	MEO1V3
June 8, 2009	Kemira Oyj	KRA1V	KRA1V3
June 15, 2009	Nokia Oyj	ENOKI	NOK1V3

As of each implementation date, all activity for the concerned underlying is transferred to the new underlying, and the new series based on it. The old underlying name will no longer be used and no series with two decimals will be generated.

Hub details.

External Test 1*

SEOMMC is accessible via the following.

London hubs 195.100.105.109 or 195.100.105.125
Stockholm hubs 194.132.163.155
One Access 192.176.3.151
