

## First North Sweden SEDOL Changes

The MIC FNSE for First North Sweden was reclassified in November 2015 as a Multilateral Trading Facility (MTF). The Norwegian Shares segment within this same market has changed the listing that they were tracking from Sweden to Norway.

As a direct result of this change the Swedish SEDOLs will be made defunct on our system and will be cross referenced to the Norwegian SEDOLs. Also the FNSE MIC will be added to the Norwegian SEDOLs at the market level only.

Please see below for the changes to be implemented on 24th February 2016.
