NB. The Time Weighted Spread (TWS) is applied to the BBO of each security, taking the spread and time weighted element for which that spread is applicable and then aggregating for the Continuous Trading Period (excluding call auctions at the beginning and end of the period). It is calculated using best price messages and omits OTC trading. Please note that where the Time Weighted Spread is 'n/a' this indicates that the security is only OTC tradable. All trade and turnover figures shown here are a sum of order book, off book and OTC business.
